

THE EVERGLADES NEWS

Serving The Vast Okeechobee Farming Area
 Estab. 1924 Published Every Friday
 Subscription Price \$2.00 Year In Advance

The Everglades News Is Entered at the Post Office
 In Canal Point, Florida, as Second Class Matter.

Paul Rardin . . . Editor and Publisher

The first week of August. Already tractors are roaring over the magic muck soil of the Everglades preparatory to another crop season.

Federal work on the Lake Okeechobee dike has stimulated business in Lake towns during the summer. The regular payroll will be missed when the dike work is completed in early fall.

Belle Glade's annual election is scheduled for Tuesday, September 10. Two councilmen are to be elected. Within a few days aspirants to the council job will be making their intentions known.

We were more than delighted to see the state road department center striping machine in action in the Glades during the week. Those bright yellow lines help to keep motorists where they belong.

If you haven't bought your driver's license yet, we suggest that you get around to it right away. One of those chaps in a state patrol car may halt you any day and ask to see the little card. It may prove embarrassing if you don't have one.

This newspaper suggested a new road from Belle Glade to Pahokee. We maintain the idea is a good one but, as yet, we haven't heard a word from a soul in either town. Well, maybe they just don't want a new road between the two thriving towns.

A GLADES-WIDE CHAMBER OF COMMERCE CAN ACCOMPLISH GREAT THINGS IN YEARS TO COME

Who says it isn't so?

A Glades-wide chamber of commerce can accomplish great things in the years that lie ahead of us! Such an organization can work toward the goal of cementing firmly the associations and friendships of citizens in every community on the shores of Lake Okeechobee. While doing such a task other good results are sure to crop out—after all anything that is good for one town in the Glades just can't do any harm to such a vast agricultural section.

It is a prosperous and ever-growing Lake Region to which we look forward. Not one town developed at the expense of another. It is a section of livelihood-earning families, secure in the knowledge that this area is founded on something substantial, that we hope for in days to come. Not towns of mushroom growth with foundations built on sand.

An organization such as we have suggested has much material with which to work. A far-flung farming community with its rich muck soil unsurpassed by any in the world. A citizenry with a pioneering spirit second to none. A group of business and professional men—with proper leadership

—who will make of this an outstanding area from many standpoints. Adequate churches, growing schools and the hundred and one other things that would go to make up a prosperous community—all add up to one thing—a growing community that has untold opportunities in the offing. Those opportunities lying dormant at present, all for the need of an organization to lead the way to bigger and better things.

CONTRIBUTION TO FREEDOM

Choose any alert boy or girl who stood for anything in the class of 1940. Find out by a few friendly questions "what he or she wants."

Romance! That will be the answer. Romance of choosing a career. Romance of courtship and marriage, romance of climbing the ladder of life with more income from year to year, more power, more freedom to enjoy all the things that loom large in the heart of youth.

Your alert young friend may find his first job right at hand in business of farming. Or he may elect more years of training for medicine, engineering, law, or the other professions. But the boy or girl you question knows that in our country in normal times, complete freedom of choice will be given. In America the choice of a career is entirely free.

And the boy or girl knows that this freedom is the result of the American system of free enterprise. Every career, from the presidency of our nation to similar or other institution, is open to the talents of him or her who can climb. This freedom was won for us by hosts of Americans who chose their own careers, installed as much machinery and other aids as they needed, did what selling was necessary to keep their farms and factories busy, and used whatever aids in selling were legitimate and in the public interest.

One of these aids is advertising. Advertising spreads the news and speeds up the sales of only those products and services which deserve to be speeded. Any intelligent young American, no matter what distorted or ignorant teaching he has received in school, is far smarter than those teachers and text book writers who claim that the intensive advertising of good commodities and services has been a detriment.

WINDMILLS VS. MOSQUITOES

From a county engineer at Vero Beach comes a brand new idea among the East which have been advanced to rid the East of its mosquitoes. This being mosquito season, it is a time when almost any suggestion, however unsound it may appear in the surface, is certain to get some attention. Some day the problem will be solved.

The latest idea is a series of windmills of appropriate design to be placed along the shores of the Indian river and in the marsh areas, to be used in pumping out the water that floods those areas in summer.

The prevalence of winds along the coast at all hours of the day and night during the summer months is pointed to as an assurance that the mills would be kept busy. The engineer also claims that the windmills would add to the attractiveness of the river section. We are not so certain of this, but attractive or not, we're for the idea if it is practical. Anything to bludge the insects.

—Titusville Star-Advocate.

Secretary Cordell Hull in Havana last week. His work and that of his co-workers around their conference table made history the world will long remember and the results of which will have a direct bearing on the future of an mankind.

KRYZWANAS-REGISTER
 Nellie Register of Canal Point and Anthony J. Kryzwanas of Jacksonville were married July 25 by Judge R. P. Roblins in West Palm Beach. The bride has been employed at the Sunrise Store in Canal Point and the groom is a fireman on the Atlas drill barge.

CANAL POINT BAPTIST CHURCH
 S. B. Jordan, Pastor.
 Sunday School meets at 10:00 o'clock. Classes for all.
 We have the combined Sunday School and preaching services which last one hour and a half.

The Young people will meet in Training Union services at 7:15 P. M. Preaching services follow making the evening services combined also.
 Mid-week prayer services will be held at 8:00 P. M. Wednesday evening.

CANAL POINT METHODIST CHURCH
 Rev. M. O. Slawson, Pastor

 Church School 10:00 a. m.
 Morning Worship 11:00 a. m.
 Young People's Service 7:00 p. m.
 Evening Worship 8:00 p. m.
 Mid-week Prayer Service, Wed. 8:00 p. m.

"I get Double Range Anti-Knock!"

Every motorist knows that there are two important ranges of acceleration where highest anti-knock performance is needed. For example, you need knockless power at 10 to 45 miles per hour for acceleration in traffic and 45 to 90 miles per hour for passing other cars and climbing hills. Some gasolines may give high anti-knock in one range but not in the other. But the new Sinclair H-C combines high anti-knock performance in both ranges.

With the Double-Range anti-knock in H-C you also get other remarkable qualities in performance. You get quick starting—rapid pick-up—smooth power—and long mileage.

Try a complete tankful of the new Double-Range H-C in your car today. Your nearby Sinclair dealer sells it at regular price. You will find it adds to the pleasure of driving and helps reduce motoring expense as well! Ask for the new Sinclair H-C.

New SINCLAIR H-C

For performance, no gasoline at regular price is superior to the new Sinclair H-C.

TOO LATE TO CLASSIFY

By Russell Kay

As brilliant as the glistering sun on the turquoise waters of the Caribbean was the masterful work of Secretary Cordell Hull in bringing together the Latin-American countries and gaining their united approval of the plan for protection of the western hemisphere.

Orphans of the storm, the possessions of European powers in the western world lay as firebrands which at any moment might plunge this hemisphere into the maelstrom of war.

Powerful and dominant, justified by the Monroe doctrine, United States might have ignored the sister nations and, acting alone, stepped in to establish a pro-

tectorate. There were some who advocated such action. Such a move would have been in keeping with the long established policies of those nations that today find themselves in a death struggle, and only would have served to generate distrust, jealousy and misunderstanding between this country and Latin America.

By inviting her sister republic to assume their share of the responsibility and join with her on a basis of full equality in working out a plan for the solution of the problem, the United States gave concrete evidence of her good faith, establishes the fact that she has no territorial ambitions, and discovers the way for a close understanding and a unity of thought and action as far as the western world is concerned.

With Europe, Asia and Africa hopelessly embroiled in a "total war," civilization totters on the brink and the hope of mankind today rests on the ability of the western hemisphere to maintain

peace and stand by to help create a new and better world upon the ruins and ashes of the present conflict.

The Americans, united in a brotherhood of nations, each respecting the rights of the other and yet conscious of a mutual welfare, can stop the forces of greed and hate and brutal aggression to preserve for mankind the liberty and freedom that is the birthright of all.

And so united, the western world may point the way to "real peace" and lasting peace through encouraging the establishment of a similar brotherhood of nations in which the peoples of all the world can live harmoniously, sharing with their neighbors and working together for the advancement and welfare of all.

It was such a world that Woodrow Wilson envisioned and it was such a world that the League of Nations was intended to foster. But old hates and distrust, greed and envy, sat at the council table as treaties and agreements were written to the need that the "war to end wars" left man with his lesson still unlearned, and there the seed was sown which gave birth to the present conflict.

United, the nations of North and South America can police this hemisphere and preserve order, and no nation or group of nations can hope to encroach upon our territory.

Through an intelligent cooperative economic program we can checkmate those who would destroy us and at the same time serve all humanity by leading aid and succor to the suffering millions who, through no fault of their own, find themselves homeless and at starvation's door.

Every American has reason to give thanks for the achievement of

FULLER'S FULMINATIONS

by Fuller Warren

THE INCREDIBLE TRUTH

When you are telling the truth that has all the earmarks of falsehood—it is mighty comforting to have someone come forth and corroborate your comments. This happened to me recently.

Several of us lawyers and a few other loafers were loitering in the "conspiracy room" of the Duval County Criminal Court, while waiting for a jury to bring in its verdict. Tall tales were being told by first one and then another. One of the boys said he was returning on a Sunday afternoon from a weekend-end of "fishing" down in Marion County. He said he was driving his car down a country road through a wooded section of that county when he saw a large gopher about 100 yards ahead of him moving slowly toward the road.

He kept driving and when he covered this distance the gopher was almost exactly in the middle of the road, crossing to the other side. He started to drive his car over the gopher. It stopped rather suddenly. Then the front part of the car began to move to the side of the road and shortly the car was being dragged through the woods, the engine having stalled. He jumped out of the car and looking underneath, saw that the front axle of the car had become lodged on the back of the large gopher, and was being borne rapidly to the gopher's hole presumably. He said he grabbed his gun, shot the gopher, hired a truck to haul him to Jacksonville, and here he was.

This reminded me of an actual occurrence that took place over in the lower end of Washington County about thirty years ago, so I put up and spoke about as follows: "That reminds me of the tragic end of my friend Dutch Ben Jer-

den's father. He was a gopher catcher by occupation and he plied his profession in a county over in West Florida that, adjoining the county where I was born and lived until I moved here.

Early one Saturday morning in 1910, Dutch Ben's father can't recall his first name—got on the trail of a gopher not far from Warsaw in the south end of Washington County. The gopher was very few feet of foot and he knew that Jerden was pursuing him for commercial purposes, so he gave old Dutch Ben a long, hard chase. But Jerden was also pretty fast on his feet and late in the afternoon he began to close in on the gopher. While he was thus hot in pursuit, with the imminent prospect of a quick catch adding zest to the chase, the gopher came to a large, cavernous gopher hole situated in a quicksand type of soil. The gopher dashed off to this retreat and rushed on down into its lower recesses. Jerden was so eager and determined to pounce upon his prey that he threw himself on his hands and knees and charged on into the hole. When he had crawled a short way in it the hole caved in and buried him alive. His sorrowing friends hurriedly gathered at his ghastly grave and, with spades and shovels dug him out by the light of a lantern.

When I reached this point in my recital the folks broke out in derisive laughter and were in the act of branding his actual occurrence as the faintest kind of fabrication, when up spoke P. Guy Crews, who was born in Westville and spent his boyhood near Warsaw, as follows: "Boys, don't be in too big a hurry to give him the honest laugh. He has told you the truth. I know, for I was there with a shovel and helped to dig Jerden out."

Drive For Funds Is Halted In County

Solicitation of funds for Red Cross relief activities among European war refugees, was abruptly at an end in Palm Beach county on Tuesday.

O. A. Gane, chairman of the county chapter, reported that he had received notice from the national organization in Washington that no solicitation could be made at once, although encouragement was given to such benefit activities as sewing and knitting groups.

A total of \$11,650.80 in contributions in Palm Beach county was reported by Gane. This is less than \$3,000 under the quota of \$14,000. Lake Worth, with nearly \$12,000 collected toward its quota of \$22,000, had already ceased solicitation.

Band Committee Has Benefit Bridge Party

Friends and supporters of the Pahokee School band gathered at the Woman's club building Tuesday night and played bridge and added a few dollars to the school band treasury. There were several who purchased tickets to the affair who did not attend. However, their money was for the benefit of the band. Light refreshments were served to those in attendance. A complete check-up of cash will be made with the Lions and Rotarians report on their ticket sales. It was said by a member of the band committee in charge of the Tuesday night affair.

New Booklet Tells Of Sugar Industry

TALLAHASSEE, Aug. 1. (AP)—Florida's Sugar Bowl, is the title of another attractive booklet issued this week by the Florida Department of Agriculture.

Containing 56 pages, the new booklet tells the complete story of Florida's sugar industry. It contains many full page illustrations of the huge United States Sugar Corporation's fields and mills at Ocala. A description of the methods of growing the cane, its harvest, pressing and finally the actual sugar production, is all covered in the booklet.

The two-color cover is an attractive combination of a green

half-tone of a portion of a Florida sugarcane field, with the title of the booklet appearing at the top in brilliant orange lettering. The job was turned out by the Orange Press of Winter Park. Copies may be secured upon request from the Department of Agriculture, Tallahassee.

The Navy Department announced last week the award of a \$10,964 contract for the construction of destroyer and tender moorings at the Key West Naval Station to Merritt-Chapman and Scott Corp., New York City. Contract calls for the jobs' completion within 40 days.

STARTING BABY CHICKS SIX TIMES A YEAR HELPS MAINTAIN HIGHER AVERAGE EGG YIELD AND INCOME

This plan keeps just enough pullets coming in to provide full houses of laying birds all year long.

Many poultry raisers today are busy maintaining steady year-round egg production and egg income by starting baby chicks six times a year, according to J. H. Burrell, Purina Mills Poultry Specialist. This is much more efficient and profitable, he says, than the age-old practice of starting out with bunches of chicks in the spring with resulting "peaks and valleys" in egg volume and earnings throughout the whole production cycle.

"On the old one-or-two-time basis," says Burrell, "poultry raisers build up markets at certain seasons of the year when they had plenty of eggs. Then they lost those markets at other seasons because they were out of eggs. But the up-and-down problem is now being eliminated by poultrymen who put out 4 to 6 broods of chicks during the year, according to the size of their flocks. The new plan keeps just enough pullets coming in to maintain full houses of laying birds all year.

How the Plan Works

"An individual poultry farm 2 acres of land is breeding chicks at a steady annual rate of a total laying capacity of 2,000 birds. They take off 150 chicks per hatch starting in January and continuing once a month through April. The fifth and sixth hatches come off in September and October. By this method their price 200 pullets into production in

THESE THINGS HAPPENED IN THE LAKE REGION 15 YEARS AGO AND WERE RECORDED BY THE EVERGLADES NEWS

The ice-making machine for the Canal Point ice plant is expected to reach Canal Point today. Mr. Burford expects he will be making ice at the plant within six weeks, possibly less.

The subscription price of The Everglades News will be raised on October 1, 1935, from \$2.00 a year to \$2.50.

J. H. Tidwell has installed fine mowers in his barbershop. The Tidwells are happy parents of a fine baby boy.

License to wed was issued at West Palm Beach, Wednesday to Geo. C. McLarty and Miss Juanita Elliott.

Passenger service on the Florida East Coast railroad will be extended to Canal Point, September 1. It is indicated by the progress made in the past 30 days on the surfacing of the grade. This will supplement the pre-pay freight service that has been in effect for 6 days. Regular train service will be put into effect as soon as the line can be turned over to the operating department.

Dick Darrow left Saturday for Chicago, where he will be gone for three months, completing his course for a certified public accountant.

The Custard Apple Inn will be moved east on Canal Street from near the office of the Everglades News to lots 31 and 32 in block 12 on the same street, a distance of about 375 feet, to a point a little east of the spillway and about opposite the former location of J. E. Carter's store.

Piles were driven this week on the 100-ft. for a building for Howard Sharp, to which the office The Everglades News will be moved, the present building to be joined to the new.

Arrangements for transforming the Canal Point High School into a vocational high school emphasizing agriculture are proceeding rapidly and will be accomplished by the opening of school this fall.

J. A. Youngblood, Superintendent of Public Instruction, said.
